Do not attempt to remove film from camera. Keep away from dust, heat and moisture. Avoid risk, electrical shock - do not disassemble camera. Fragile, do not drop.

1. Turn the advance wheel until it stops.
 2. Look at your subject through the viewfinder whilst keeping at least 1 metre distance.
 3. Press the shutter release button gently.
- To use flash slide the flash button on the front of the camera until the flash light stays lit, gently press the shutter release with the flash button still on. When the last shot is taken wind the film as far as it will go. Then take the whole camera to your developer for processing.
